🪪 PROFILE

I am a dedicated and results-oriented professional with a positive attitude towards every role I am entitled or required to participate in. I am equipped with excellent communication skills and proficient at working with diverse stakeholders .I am passionate about leveraging technology to empower individuals and organizations with the knowledge and skills necessary to succeed in today's digital landscape.

🧩 TECHNICAL SKILLS

- Python with Flask,
- SQL,
- JavaScript,
- React, Angular
- HTML & Css
- Graphic Design Skills(Figma, Adobe Photoshop)

📂 TECHNICAL PROJECTS

Neda Learning Management system ⤴

This project is a Learning Management System (LMS) web application built with React. It provides an intuitive interface where users can access courses and navigate through the content.

git hub : https://github.com/Emmamwitimi/NEDA-LMS ⤴

demo: https://neda-lms-soft.vercel.app/ ⤴

Nawiri Booking System

Nawiri is a simple web application that allows users to search, filter, and book stays at various houses located in different regions. The project demonstrates the use of React for building interactive user interfaces, state management, and handling form submissions.

github : https://github.com/Emmamwitimi/Nawiri-in-React ⤴

demo : https://nawiri-in-react.vercel.app/ ⤴

Interactive Shopping List

The **Interactive Shopping List** application allows users to create a dynamic shopping list where they can add, edit, and delete items. It features a user-friendly interface styled with Tailwind CSS and saves the shopping list in the browser's local storage for persistent data.
